

## Electrical Parts for Forklifts

Forklift Electrical Part - Forklifts can be specifically marked to be used in unsafe places. A labeled forklift indicates the design has met the least standards of ANSI/UL 558 for engine powered forklifts or ANSI/UL 583 intended for electric lift trucks for the type of label attached.

The application for labels used for lift forklifts can be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Areas or Use, Maintenance and Operation, and Type Designations. Check with your local insurance carrier and Fire Marshall for more info about the approved uses of industrial powered forklifts in your application.

If the forklift has been found to meet the outlined criteria, the following labels may be attached. A marked truck will have the type designation put on the forklift nameplate and would have one of the following labels attached.
