

## Pulp Clamps

Pulp Clamps - There are a lot of different lift truck attachments that can be used in order to make lift trucks far more useful. Snowplow accessories could be mounted onto the front part of a forklift. A scoop bucket could be helpful when the task requires moving sand, gravel, soil or snow. A double block handler permits the forklift operator to lift\carry two loads and after that pile them side-by-side. Many of those accessories are really excellent for light to medium duty work.

Another lift truck accessory is the package lift clamp, that could carry and move really heavy pallets. Furthermore, pallet crane forks may be used to carry and transfer pallets with an overhead crane. A drum clamp accessory is helpful for transferring very heavy drums from place to place without having to utilize a pallet. Forklift mounted hoppers enable material to be moved and dumped without having to do it manually. These hoppers are self dumping when the bumper is released.

Accessible attachments now consist of accessories that allow a forklift to execute the task of a commercial mop or broom. Those specific accessories are most frequently utilized cleaning parking areas, storehouse floors, and boat docks. Lift truck mounted platforms come equipped with twin entry doors and could be hooked up to transport personnel from one area to another. The mounted platform attachment is ideal for reaching places that are difficult to access, especially if you have merchandise or things stored in out of the way areas or really up high.

Attachments can be a very valuable piece of equipment when installed onto a forklift, transforming a regular lift truck right into a mobile crane unit. It is most helpful when transferring unstable or awkward loads. This accessory could either be telescopic, mounted on the carriage itself, or be fixed or lift truck mounted.
